

Malaika Tauqeer

Engineering intern with practical experience in high-voltage substation equipment operation and power transmission system analysis.

Work Experience

Internship	National Transmission and Despatch Company Jun 2025 - Jul 2025
Learned basic operation of high-voltage substation equipment including transformers, circuit breakers, CTs and PTs. Observed power transmission and protection systems in a 220 kV grid station of NTDC. Analyzed transmission system performance data to support preventive maintenance, enhancing equipment longevity and reducing unexpected disruptions.	

Teacher Assistant	University of Management and Technology Mar 2025 - Feb 2026
Mar 2025 - Jul 2025: Assisted students in understanding OOP concepts (classes, objects, inheritance, polymorphism) and helped debug code and coding assignments.	
Oct 2025 - Feb 2026: Assisted students with circuit analysis, engineering ethics, and ICT concepts; supported tutorials and checked assignments, quizzes, and exam papers.	

Education

BS Electrical Engineering	University of Management and Technology Oct 2023 - Jul 2027
- Pre Engineering, Government Graduate College, Lahore (Aug 2021 - Jun 2023) - Built strong foundation in mathematics, physics, and engineering fundamentals prior to BS Electrical Engineering.

Skills and Expertise

- Student Engagement
- Analytical Thinking
- Teamwork
- Communication Skills
- Active Listening
- MATLAB & SIMULINK
- Sensor Intergration
- Embended
- Automation

Achievements

Reliability & Initiative
Quickly adapted to a fast-paced industrial environment and earned the trust of supervisors to handle real-time operational tasks independently.
Mentorship & Communication
Built strong rapport with students through clear, patient communication, helping many gain confidence and improve their grades in technical subjects.
